# Developmental changes in hypothalamic–pituitary–adrenal activity over the transition to adolescence: Normative changes and associations with puberty

MEGAN R. GUNNAR, SANDI WEWERKA, KRISTIN FRENN, JEFFREY D. LONG,  
AND CHRISTOPHER GRIGGS  
*University of Minnesota*

Figure 5 in the original manuscript contained errors in the reporting of the preejection period data. The decimal point was inadvertently shifted 1 point to the left. Figure 5 is reprinted

here with the values correctly reported. The authors regret these errors and any problems they may have caused.

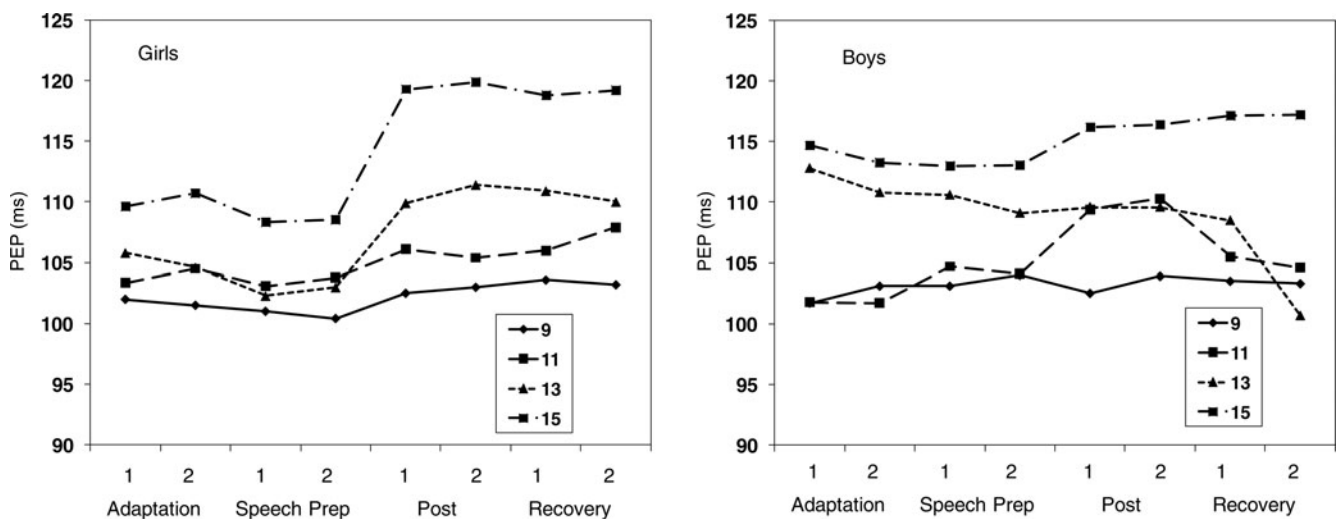

Figure 5. Means and standard errors of the mean for PEP during the TSST-C by age group.
