Foreword xi

Preface xiii

Chapter 1. The Likelihood Approach 1

1.1 Processes Based on the Likelihood Ratio 1
1.2 Proofs for Approximations of Log Likelihood Ratio Processes 7
1.3 Asymptotics for the Maximum Log Likelihood Ratio Test 21
1.4 Some Examples 27
1.5 The Maximal Log Likelihood Ratio Test under Alternatives 34
1.6 Estimators for the Time of Change 50
1.7 More Applications of the Likelihood Principle 57
1.7.1 Fisher-Score Change Processes 57
1.7.2 Maximally Selected Chi-Square Statistics 58
1.7.3 Multiple Changes 60
1.7.4 The Epidemic Alternative 62
1.7.5 Estimating the Number of Changes 64
1.8 Further Results and Remarks 65

Chapter 2. Nonparametric Methods 67

2.1 Change in the Mean 67
2.2 Change in Location 89
2.3 Wilcoxon-Type Statistics 98
2.4 Processes Based on U-Statistics 110
2.5 Pontograms 135
2.6 Applications of Empirical Distributions 152
2.7 Sequential Ranks 157
2.8 More Nonparametric Methods 170
2.8.1 Estimators for the Time of Change 170
2.8.2 Tests Based on M-Estimators 178
2.8.3 Moving Sums 179

2.8.4 Nonparametric Tests for Epidemic Alternatives 181
2.8.5 Smooth Changes 186
2.8.6 Multiple Change-Points 187
2.8.7 Change in the Variance 188
2.8.8 Detection of Changes in Angular Data 190
2.9 Further Results and Remarks 194

Chapter 3. Linear Models 199

3.1 On the Maximum Likelihood Ratio Method in Linear Regression 199
3.1.1 Change in Regression Coefficients 199
3.1.2 Change in Regression Coefficients and the Variance 203
3.1.3 Proofs of Theorems 3.1.1 and 3.1.2 206
3.1.4 Proofs of Theorems 3.1.3 and 3.1.4 219
3.1.5 The Union–Intersection Test 224
3.2 Tests Based on Comparison of Estimators 230
3.2.1 Direct Tests for Trend 231
3.2.2 Chow's Tests 247
3.3 Sums of Regression Residuals 248
3.4 Sums of Recursive Regression Residuals 261
3.5 Consistency of Tests in Sections 3.1–3.4 268
3.5.1 The Likelihood Ratio Test for Change in Regression Coefficients 268
3.5.2 The Likelihood Ratio Test for Change in the Regression Coefficients and the Variance 274
3.5.3 Consistency of the Union–Intersection Test 276
3.5.4 Consistency of Direct Tests 279
3.5.5 Maximum of Sums of Regression Residuals 280
3.6 Estimators for the Time of Change 281
3.7 Further Results and Remarks 297

Chapter 4. Dependent Observations 299

4.1 Weakly Dependent Sequences 299
4.2 Procedures Based on Residuals 312
4.2.1 Stationary ARMA(p,q) Processes 312
4.2.2 Explosive $AR(p)$ processes 321
4.2.3 Random Walk Model 327
4.3 Change in the Mean of Strongly Dependent Sequences 329
4.4 More on Dependent Observations 354
4.4.1 Back to Maximal Likelihood Ratio 354
4.4.2 Spectral Empirical Distributions 356
4.5 Further Results and Remarks 358

Appendix 350

A.1 Approximations for Partial Sums of Random Variables and Random Vectors 359
A.2 Approximations for Empirical and Quantile Processes 361
A.3 Limit Theorems for Ornstein–Uhlenbeck and Related Processes 363
A.4 Limit Theorems for Standardized Partial Sums and Related Processes 368
A.5 Integral Tests for some Gaussian Processes 372
A.6 Contiguity 374
A.7 Integral Tests for Functionals of Kiefer Processes on R^d 378
